

ADVENTURE ASIA TRAVEL SYSTEM

Technical PRD

Authors: Nwanozie Promise and Oluwafemi Samson

1. End-to-End Flow

Adventure Asia does not sell trips directly from suppliers.

Suppliers only provide **sample trips**, and Adventure Asia converts those samples into **customized trips for each customer**, then sells the approved version as the real product.

So the system has 2 main phases:

1. Template phase (before customer)
2. Customer trip phase (after inquiry)

1. Supplier provides sample trips → becomes Template

Suppliers send Adventure Asia ready-made trip ideas.

Each sample contains:

- Day-by-day itinerary
- Base price
- What is included
- Hotel level / transport / activities
- Assumptions (2 pax, season, etc.)

Adventure Asia Content/Admin enters this into the system.

In the system this becomes: Trip Template

Templates are not sold directly.
They are only **starting points**.

These templates are what customers see on the app / website.

So at this stage we have:

Supplier → Template → Published in catalog

2. Customer browses templates and makes inquiry

The customer opens the app or website.

Customer sees trip ideas like:

- Bali 5 Days
- Thailand Adventure
- Vietnam Family Tour

These are templates.

Customer clicks:

Order this trip / Inquire

Customer enters name + email

System creates:

- Customer account
- Inquiry / Trip Case
- Link to Template

Important:

The customer did NOT buy anything yet.

This is only:

A request to customize a trip

3. Trip Case is created (this is where real work starts)

When customer inquires, the system creates:

Trip Case

Trip Case = container for this customer's trip

Inside the Trip Case we will create versions.

Trip Case belongs to:

- Customer
- Sales Specialist
- Template (reference only)

This is the key object in the system.

4. Sales creates Version 1 (first plan)

Sales / Travel Specialist takes the template and creates a custom version for the customer.

This becomes:

Version 1 (V1)

This version may change:

- Dates
- Group size
- Hotel class
- Activities
- Price

Important rule:

Versions belong to the Trip Case, not to the Template. The template stays unchanged.

5. Customer reviews → revisions → new versions

The customer sees V1 in the app.

Customer may say:

- change hotel
- change dates
- add activity
- reduce price
- go back to old plan

Sales creates:

V2,V3,V4, V5 ...

Each version is saved.

Customers always see the latest version.

Because system is digital, no need for:

V1 Sent / V2 Sent / V3 Sent

Better status:

Building → Confirmed

Because customers already see changes live.

6. Customer approves one version

Customer chooses one version and says:

OK, this is the one

That version becomes:

Approved Version

The system locks it.

No more editing.

This approved version becomes:

Confirmed Trip Order

This is the real product Adventure Asia sells.

Not the template.

Not the case.

Not the versions.

Only the approved version.

7. Ops confirms with suppliers

Now the Ops team contacts suppliers.

For each item in the plan and Supplier replies. The final price may change from template price.

System stores:

Supplier Bookings

Each item gets: Supplier, price, voucher, status

Trip is now:

Confirmed & Booked

8. Payments (customer side)

The customer can pay in installments.

Example:

- Deposit
- Second payment
- Final payment

System creates:

Customer Invoice
Payment Schedule

Admin marks payments as received.

Trip payment status updates.

9. Payments (supplier side)

Adventure Asia also pays suppliers.

10. Final result

At the end we have:

Template → catalog only
Trip Case → working container
Versions → negotiation
Approved Version → product sold
Order / Trip → final record
Supplier bookings → confirmed
Invoices → customer payments
Bills → supplier payments

2. USER ROLES & PERMISSIONS (RBAC)

Roles

Role	Permissions
Admin	Full system access
Sales	Trip management, invoice, payment updates
Content Creator	Activity management only
Customer	Discovery + View own trips

Permission Matrix

Admin

- Admin management (CRUD, block/unblock)
- User management
- Activity management
- Trip plan management
- Invoice & payment updates
- Trip checks update
- Status updates

Sales

- Trip Plan management
- Manage payments

Cannot:

- Manage admins
- Create/edit activities

Content Creator

- Create activity
- Edit activity
- Delete activity
- Draft activity

Cannot:

- Access trip plans
- Access sales
- Access admin management

Customer

- Register/Login
- Browse activities
- Inquiry
- View own trip plans
- View itinerary
- Update profile
- View payment history

4. TRIP CASE STATUS

New Inquiry

Discovery

V1,V2,V3 (building, sent)

Confirmed

Supplier Confirming

Invoice Sent

Payment Pending

Paid

Pre-Departure

On Trip

Completed

Cancelled

5. DATABASE DESIGN (MVP STRUCTURE)

5.1 USERS

- id (PK)
- name
- email (unique)
- phone
- otp
- address
- gender
- marital_status
- profession
- profile_picture
- role (admin, sales, content_creator, customer)
- is_blocked (boolean)

5.1 USERS OTP

- Id
- User_id
- Otp
- Is_used
- expires_at

5.2 SUPPLIERS

- id (PK)
- company_name
- email (unique)
- Phone
- Contact_name

5.3 Areas

- id (PK)
- name (unique)

- media
- Desc

5.3 Countries

- id (PK)
- name (unique)
- media
- Desc
- geo_coordinates (lat,lng)
- Faqs (json)
- Festival (json)
- Weather (json)

5.3.1 Destinations

- id (PK)
- name (unique)
- Media
- Description
- country_id (FK → countries)
- geo_coordinates (lat,lng)

5.4 Hotels

- id (PK)
- name
- country_id (FK → countries)
- Destination_id (FK → Destinations)
- Supplier_id (FK → Suppliers)
- Links (json)
- media
- Desc

5.5 ACTIVITIES

- id (PK)
- Description
- title
- thumbnail
- media
- intensity (enum: Rest, Low, Medium, High, Extreme)

- experience_type (enum: Hiking, Biking, Culture, Wildlife, Food, Nature, Boat, Adventure, Urban, Relaxation)
- country_id (FK → countries)
- city
- geo_coordinates (lat,lng)

5.6 TRIP_PLANS

- id (PK)
- supplier_id (FK → suppliers)
- created_by (FK → users)
- media
- Summary
- What it has (json)
- What it does not have (json)
- status (enum)
- trip_style
- start_date
- end_date
- price (json)
- country_id (FK → countries)
- geo_coordinates (lat,lng)
- is_published (boolean)

5.7 TRIP_PLAN_ITINERARY

- id (PK)
- trip_plan_id (FK → trip_plans)
- activity_id (FK → activities)
- day_number (int)
- transfer_type
- hotel
- travel_hours
- activity_period (enum: morning, afternoon, evening)
- location_type (enum: start, end, overnight)
- note

5.8 TRIP_CASE

- id (PK)
- trip_plan_id (FK → trip_plans)
- user_id (FK → users)
- created_by (FK → users)
- status (enum)
- trip_style
- start_date
- end_date
- Price
- country_id (FK → countries)
- geo_coordinates (lat,lng)

5.9 TRIP_CASE_VERSIONS (V1 V2 V3)

- Id
- Trip_case_id
- Version_number
- Created_by
- Notes
- Is_sent_to_customer
- Is_approved
- created_at

5.10 TRIP_CASE_VERSION_ITINERARY

- id (PK)
- trip_case_version_id (FK → trip_case_version)
- activity_id (FK → activities)
- day_number (int)
- date
- transfer_type
- hotel
- travel_hours
- activity_period (enum: morning, afternoon, evening)
- location_type (enum: start, end, overnight)
- note

5.11 TRIP_CASE_CHECKS

- id
- trip_case_id
- hotel_confirmed (bool)
- tour_confirmed (bool)
- pre_trip_recheck (bool)
- emergency_contact
- insurance_check (bool)
- payment_verified (bool)

5.12 PAYMENTS

- id
- Trip_case_id (FK → trip_cases)
- invoice_id (FK → invoices)
- amount
- payment_method
- Status
- Type (deposit,, final)

5.13 INVOICES

- id
- amount
- Items (json)
- Status

5.13 NOTIFICATIONS

- id
- user_id
- Title
- Message
- Type
- is_read

7. CUSTOMER APP MODULES

7.1 Registration

- Name
- Email
- Phone
- Address
- Gender

7.2 Profile Update

- Name
- Email
- Phone
- Address
- Profession
- Profile picture

7.3 Discovery

- Map view (markers from destinations(countries) =>activities)
- Search bar
- View by destinations,interest, filters: (Intensity, Experience type,Popularity)

7.4 Inquiry

- Enquiry button
- Creates Trip_case (New Inquiry)

7.5 My Trips

- List of trip cases
- Status badge
- View itinerary

7.6 My Payments

- View payments

8. ADMIN PANEL MODULES

- Dashboard (stats optional for MVP)
- Admin management
- User management
- Suppliers management
- Hotel management
- Area management
- Country management
- Destination management
- Activity management
- Trip plan management (create trip plan, create Itinerary for a trip, generate invoice for a trip)
- Trip case management
- Trip checks
- Payments
- Audit logs
- notifications
